Global Challenge

Safety

Introduction
Learning objectives:

• to understand why the UN has set sustainable development goals
• To know about the sustainable development goals that involve promoting ‘safety’
• To be able to discuss what safety means to different children in their community and around the world.
Safety

Goal 11: Make cities and human settlements inclusive, safe, resilient and sustainable.
Safety when travelling or in towns and cities, especially for vulnerable people

Goal 4: Quality education
Safety when at school for all children

Goal 16: Peace, Justice and strong institutions
Safety at home
What does safety mean to you?

Think about:

- travelling to school and around your local area
- at home
- at school

- what does being safe feel like to you?

- what do you need to be safe?
Safe air to breathe

- illegal levels of air pollution linked to child’s death
- air pollution levels in the UK (& world)

Safe places to sleep

- more than 120,000 children are officially homeless
- street child world cup

Safe from accidents

- accidents leading cause of death for children
- road accidents biggest killer of teens globally
Your task: complete the worksheet

- your chosen area of safety
- one key statistic
- describe the situation the children are in
- how safe do you think the children feel and why?

Group name ____________________________

Research your chosen topic and note down answers to the following to help you present your ideas.

Your chosen area of safety:

One key statistic:

Describe the situation the children are in:
Increasing safety

Plan to teach all children first aid

School children in England will have to learn first aid under proposals put forward by the government.

Road ready? Expect the unexpected

In this film, CITV presenter, Sam Homewood, encourages children to be ‘road ready’ and be safe on the road.
Your task: increasing safety

- how could children’s safety be increased in the area you have researched?
micro:bit global challenge competition

- Design and create an original innovation using micro:bit to help to improve safety for children.
Learning objectives:

● to understand why the UN has set sustainable development goals
● To know about the sustainable development goals that involve promoting ‘safety’
● To be able to discuss what safety means to different children in their community and around the world.
